

200-X

Sweep Type Loaders / Unloaders

RETORT ROOM MACHINERY FROM
THE RETORT PEOPLE

LOW COST AUTOMATION

The **200-X** Series Loaders and Unloaders by Allpax provide food processors with consistent automated throughput at the lowest capital outlay. The **200-X** Series automatically forms containers into layer patterns, feeds the pattern into the sweep box, then sweeps the containers into the basket. The basket height is automatically indexed and controlled by an operator push-button that activates a severe-duty hydraulic lift. Divider sheets are hand-placed by the loader operator.

STANDARD & NON-STANDARD BASKETS

The **200-X** Series Loaders and Unloaders can be modified to accept existing baskets or non-standard-size baskets.

CONTAINERS

Customer to Specify: 3oz to #10 Cans, Bottles, Jars, and other glass products.

STAINLESS STEEL CONSTRUCTION

The **200-X** Series Loaders and Unloaders are built with a heavy-duty welded 304-Stainless Steel frame. The frame is laser cut using computer control for exact precision and tolerances.

EQUIPMENT FEATURES

- 304 Laser-Cut Stainless Construction
- 304 Stainless Electrical Panel
- Severe Duty Hydraulic Lift
- Automated Container Sweep
- High Performance Pneumatic Cylinder Sweeping Operation
- Servo Driven Sweep For Ramping, Positioning Accuracy and Rapid Changeover
- Automated Pick & Place Divider Sheets
- Automated - Layer Height Indexing
- Automated Basket Infeed & Eject
- Automated Divider Sheet Transfer
- Standard Components
- Intralox Conveyor Belting
- Push-Button Operator Interface
- Color / Touchscreen Operator Interface
- Mini-Logic Controller
- Advanced PLC / VLC Control System for Conveyor Automation Capability
- ABRS-ready System Integration

DIMENSIONS

See Reverse Side for General Equipment Footprint. Contact Allpax with your specific basket size for exact dimensions.
